form part of the agreement to be entered into by the accepted tenderer. The Master Detailed Standard Specifications and other documents submitted with the contract work as specifications, plans, descriptive specifications sheet regarding materials, etc., can be seen at any time between 10 a.m. and 5 p.m. at any time after the date of the tendering programme, Hudson's Bay. A copy of the set of general documents can also be had on payment of 10c (quarterly only) for each set.

5. The tenderer's attention is directed to the requirements for materials under the clause "Materials and workmanship" in the "Preliminary Specifications" conforming to the British Standard Specifications shall be used on the work, and the tenderer shall quote his rates accordingly.

7. Every tenderer is expected, before quoting his rates, to inspect the site of the proposed work, but should also inspect the quantity and quality of materials. The nature of quantity, labor, etc., wherever certain materials are in the contract will be given in the Descriptive Specifications sheet. The list of materials to be obtained from the quantity or other source defined shall be used on the work. In every case the materials must comply with the relevant standard specifications. Samples of materials as called for in the standard specifications, or in the tender notice, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply of materials is begun. If the contractor, after examination of the nature of materials defined in the Descriptive Specifications sheet, is of opinion that materials complying with the standard or other specifications of the contract cannot be obtained in quality as sufficient quantity from the source defined in the Descriptive Specifications sheet, he shall so state clearly in his tender and advise the tenderer to furnish materials, subject to the approval of the Supervising Engineer.

8. The tenderer's particular attention is drawn to the sections and clauses in the standard "Preliminary Specifications" dealing with—

- (1) Time, completion, and rejection of defective materials and work.
- (2) Cautions.
- (3) Discontinuation of work.
- (4) Water and lighting.
- (5) Drawing up during progress and for delivery.
- (6) Accidents.
- (7) Delay.
- (8) Particulars of payment.

The contractor should clearly provide all the specifications clauses which govern the work which he is tendering.

9. A schedule of quantities accompanies this tender notice. It shall be definitely understood that the Government does not accept any responsibility for the accuracy or completeness of this schedule, and that the schedule is liable to alteration by increase, decrease, or addition at the discretion of the Executive Engineer, Public Works Department, or as set forth in the conditions of contract. The tenderer will, however, have his responsibility for the accuracy of quantities. He should quote specific rates for each item in the schedule, and the rates should be in rupees only and in terms of time given. The rates should be inclusive both of wages and expenses and the tenderer should also show the total of each item and the grand total of the whole contract, and quote in the tender a lump sum for which he will undertake to do the whole work subject to the conditions of contract, such lump sum agreeing with the total amount of Schedule A. The schedule accompanying the tender notice shall be written legibly and free from erasures, overwriting or corrections of any kind. Corrections, when necessary, should be made by crossing out, including, deleting and re-writing.

10. Tenders offering a percentage deduction from the lump sum or a percentage amount and those not submitted in proper form or in due time will be rejected. Rates or lump-sum amounts for items not called for shall not be included in the tender. No alteration whatsoever in the tender, in the contract form, the conditions of contract, the drawings, specifications or variations accompanying same will be recognized, and, if any such alterations are made, the tender will be void.

11. The tenderer should work out his own rates, without reference being made to the Public Works Department current schedule of rates or to the Public Works Department estimate rates which are not work for submission by tenderers.

12. The price at which and the source from which certain particular materials shall be obtained by the contractor are given in the end of the schedule accompanying the tender form. Tenderers must accept the material in those prices, and shall quote their price for finished work accordingly. Notwithstanding any subsequent change in the value for these materials, the change in the contract will remain an entirely correct in the system contract. No savings or incidental charges will be borne by Government in connection with this supply.

13. The situation of the tenderer is directed to the contract requirements as to the time of beginning work, the rate of progress, and the date for the completion of the whole work and the several parts. The following rates of progress and productivity value of work done from time to time, as will be indicated by the Executive Engineer's certificate of the value of work done, will be required. Date of commencement of the programme will be the date at which the site (or premises) is handed over to the contractor.

The following Bill was introduced in the Legislative Assembly on the 2nd April 1939:—

L.A. BILL No. 27 OF 1939.

A Bill to amend the Indian Tea Control Act, 1938.

WHEREAS it is expedient to amend the Indian Tea Control Act, 1938, in the manner hereunder appearing, it is hereby enacted as follows:—

1. (1) This Act may be called the Indian Tea Control (Amendment) Act, 1939.
- (2) It shall come into force on such date as the Government may direct.
2. For sub-section (7) of section 24 of the Indian Tea Control Act, 1938, the following shall be substituted, namely:—
- "14. (1) Any tea estate or any sub-division of a tea estate in which an export quota was allotted under the Indian Tea Control Act, 1938, and any tea estate which the Central Government may within one year from the commencement of this Amendment Act authorize to supply tea for the allotment of an export quota under this Act, shall on application made to the Commission for the allotment of an export quota have the right, subject to the provisions of this Act, to receive an export quota.
- (2) All applications for authorization under this section shall reach the Central Government within six months of the commencement of this Amendment Act.
- (3) The owner of a tea estate praying for authorization within the prescribed time limit, in whose case an export quota has been reported as exhausted or other grounds shall have a right to appeal to the Central Government who shall have the power to reconsider the matter."

STATEMENT OF OBJECTS AND REASONS.

Second part of the section 24 (2) of the Indian Tea Control Act, 1938, runs thus:—any Tea Estate which the Central Government may within one year from the commencement of this Act authorize to supply for the allotment of export quota under this Act, etc.

Tea Tea Control Act came into force on 31st March 1939 and the prescribed time limit of one year as provided for in section 24 (2) of the Act was over on the 31st March 1939. Many tea estates in India have been allotted the export right under section 24 (2), but by now, many estates in Madras Hill Tracts, Darjeeling and in Chittagong division, as the other hand are not being able to produce any tea as the Central Government refused permission in some cases and as the prescribed time limit was over before the Central Government could authorize in many other cases. Many of these tea estates could have produced tea for the export market if their claims were favourably considered by the Government.

The language of section 24 (2) of the Tea Control Act is rather vague. There is no specific direction as to the time limit within which the Central Government was to be served for the necessary authorization, as a result of which, many tea estates made their applications for authorization only a month or two before 31st March 1939, and the time limit was over before the permission could be granted to those tea estates. We therefore, propose, that the language of the language of section 14 (2) is responsible for depriving those tea estates from their due share of the export quota.

The section has not provided for any reconsideration by the Central Government in cases of appeals not getting the necessary sanctionless. Wrong reports from Inspectors or other technical grounds have depraved many estates from getting the necessary permissions. Previous might to have been made in the Act for reconsideration by the Government in such cases. So there is necessity for this Amendment Bill.

Witness is a necessary and important factor to succeed the Criminal Law of kidnapping and abduction in India, it is heavily assessed as follows:-

(1) It shall apply to whole of British India.

EIT and impact

2. In section 301 of the Indian Penal Code, for the words "under seventeen years of age if a male, or under sixteen years of age if a female," the words "under eighteen years of age" shall be substituted.

The object of this amendment is to raise the age limit of a person, female as well as a male, in connection with the effects of kidnapping and abduction to under eighteen years, instead of the existing limit of under sixteen years and fourteen years in the case of a female and a male child respectively.

This is not a new discovery. Experiments show that advantage in being able to learn from the past is a major advantage in many, both male and female, of almost all species. The ability to learn from the past is a major advantage in many, both male and female, of almost all species. The ability to learn from the past is a major advantage in many, both male and female, of almost all species.

In meeting 206-8, I.P.C., the agreement in the case of a girl has been raised to under eighteen years. In sections 272 and 273, I.P.C., which also deal with the sexual union of persons, the age limit has been raised to under eighteen years. Lastly some High Courts and recently the Federal Commissioner of India in the "Nelson, alias Ramare Case" have recognized the urgent need of this amendment.
